

SL8V Testimonials

After using the Velcro® Drum Sander...we have found it to be above average in overall performance and quality. Not one customer has reported a problem or complaint. On the contrary, our existing customers are now requesting the Velcro® Sanders if they are available. For new customers and first time DIY users, there is no question that this is the way to go.

The SL8V sander has made our lives so much easier; it saves time on the initial rental and saves the customer time loading the paper. It has been well worth the wait!

Will McGowan

I rented the SL8V to a custom woodworker. He loved it, saying it saved him time and was easy to use. He didn't loose any paper and told me the floors look great, no chatter marks!

Grove Rental
Bedford, NH

We've had great success with the SL8V. It is so easy to explain that we save time during the rental process, making us more profitable. It's easy, the paper lasts longer and it works!

Dennis
Liberty Rentals
Peace Dale, RI

Our staff spends less time on the customer installation instructions and no time trying to re-explain how to install the paper. ... After six months in service we have had no customer complaints of the paper "blowing off". I would definitely recommend this new model.
